

Region 3 GPRA Baseline RCRA Corrective Action Facility

Neville Chemical Co.

**Grand Avenue and Navy Road
Pittsburgh, PA 15225
Congressional District 14
EPA ID #: PAD004334157
Last Updated: 6/30/2005**

Current Progress at the Site

This facility is one of EPA Region III's high priority RCRA corrective action sites. It is located in Pittsburgh, PA and consists of approximately 68 acres. The facility is currently under an Order from PADEP to implement corrective action measures to be protective of human health and the environment. In August 2003, EPA, PADEP, and EPA's contractor conducted a site visit to assess the current condition at the facility. The purpose of the visit is to determine if the facility meets the Environmental Indicators (EIs) for Human Exposures and Migration of Contaminated Groundwater. Based on the information gathered from the site visit, current corrective measures and numerous file reviews, EPA concludes that additional measures may be required to be protective of human health and the environment.

In April 2004, Neville Chemical signed a new Consent Order and Agreement with PADEP to address the groundwater remediation and surface water assessment. The implementations consist of groundwater and surface water monitoring and optimizing the current groundwater remediation system. The Allegheny County Health Department (ACHD) is addressing the VOC air emissions onsite, specifically the resin rework area and the wastewater treatment tanks. Neville Chemical will install temperature control lockout and additional operating procedures for maintaining effective compliance at the resin rework area and will install covers over the wastewater treatment tanks. In addition to the work at the Neville Chemical facility, the ACHD will conduct a 2-year air quality study in and around Neville Island to evaluate the air quality in the region. Upon completion of the study and the onsite implementations, EPA will re-evaluate the facility to determine if the facility meets the Environmental Indicators (EIs) for Human Exposures and Migration of Contaminated Groundwater.

Site Responsibility

RCRA Corrective Action activities at this facility are being conducted under the direction of the State with assistance from EPA Region 3.

Institutional Controls

Institutional controls are not required at this time.
